

Notebook Computer Locker

Description

Designed to secure laptops, data projectors, PDA's, digital cameras and other valuable electronic items against unauthorised removal. Particularly suited to educational and corporate organisations.

Features and Benefits

- 10 Compartments with large enough volume for standard notebook or data projector in bags
- Individual internal power points allows charging of equipment overnight. All compartments have ventilation.
- Locker is constructed of strong 1.5mm steel (double the gauge of standard filing cabinets)
- Doors corners are folded and welded to add strength and resistance to jemmying.
- Locker is secured to floor by a high strength, attack resistant, protected bracket system affording ultimate security and Earthquake protection against personal injury and general damage
- Option of high quality pick-resistant tubular locks for single user per compartment or wing handles with standard padlocks for multiple users per compartment.
- Keying options – keyed alike or keyed different with master key
- Anti-jemmy design provides strong defence against attack
- Aesthetically attractive design with quality finishing
